

A task for an intern - Appleseeds

1:10 difficulty grid

tech stack : Nodejs , Express , typescript , mysql , react

Libraries for building the bot

Task description: You must create a basic system that will implement CRUD, the system will be a mini-crm, the system will actually receive leads (inquiries from potential customers who are interested in the company) and .will allow you to update data on them

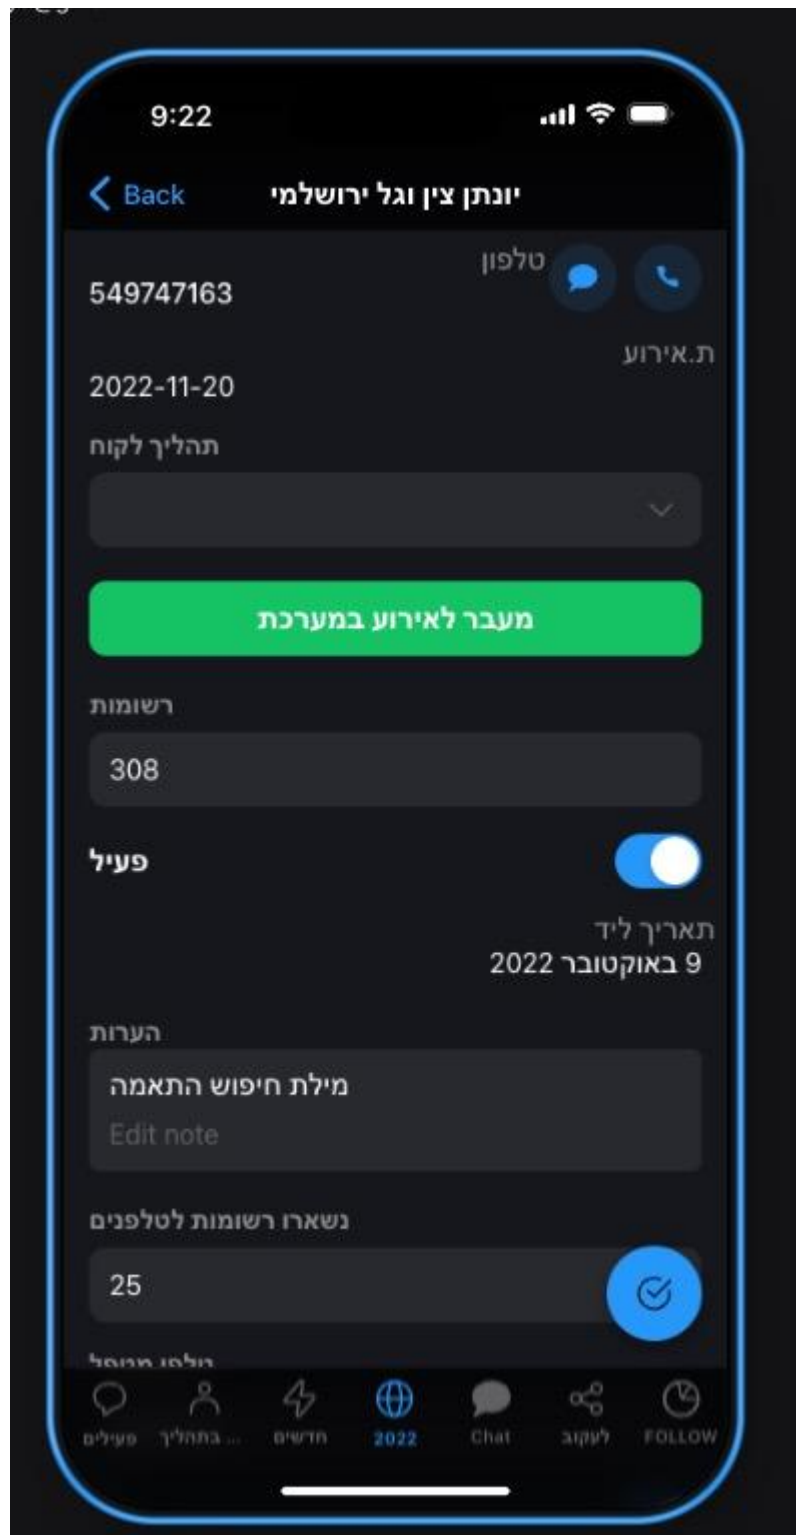

Lead table

name	type	collection	index	
id	int(11)			AUTO_INCREMENT
name	varchar(20)	utf8_unicode_ci		
phone	varchar(20)	utf8_unicode_ci		
event_date	varchar(20)	utf8_unicode_ci		
email	varchar(20)	utf8_unicode_ci		
location	varchar(20)	utf8_unicode_ci		
LeadStatus	int(1)			

The LeadStatus column is linked to another table named LeadStatus

name	type	collection	index	
status_id	int(1)			
status_name	varchar(20)	utf8_unicode_ci		

המשתמש יוכל להכנס לעדכן את המידע על הלידים.
